

# SAP S/4 HANA IMPLEMENTATION AT THE BLISSCO PLANT AND CONSOLIDATION OF BUSINESS PROCESSES.

*Supreme.*

## BUSINESS OBJECTIVE

The existing business process had many gaps in the areas of Inventory management, Production scheduling and tracking, Product costing, Demand planning, Order management and Batch tracing.

Business objective was to identify process gaps and implement solutions to streamline the business operations.

Act as an Implementation partner for the SAP S/4 HANA solution at the Blissco site and train the super users on the new process.

## ABOUT THE COMPANY

Supreme Cannabis is a globally diversified portfolio of distinct cannabis companies, products, and brands. Since 2014, the Company has emerged as one of the world's fastest-growing, premium plant driven-lifestyle companies by effectively deploying capital, with an emphasis on disciplined growth and high-quality products.

## BUSINESS COMPLEXITIES

Cannabis is a new industry and SAP does not cater to the standard practices within this area.

QM procedures are manually being done without any traceability.

Discrepancies in physical process flows and System data entry.

The SKU numbers are not optimized efficiently with tracking of product for each Batch/Crop level.

Movements are recorded in the system manually at the end of the day after the physical movement.

Production orders are not synced from end to end (Bottling, labelling, Cloning, Packing etc).

Province wise demand forecast inefficiencies are leading to under utilization of resources and raw material deficiency.

## PROJECT HIGHLIGHTS

Implemented Pricing procedure, Tax determination, Route determination and Shipping point functionalities were implemented in the OTC scenarios.

Accelerated returns process has been designed and implemented to streamline the returns capabilities.

Ethanol backflush and recovery process has been implemented.

Solution designing and Implementation of SAP QM Inspection plans and Quality notifications.

Batch tracing functionality, BOM, Routings, Work centers and Rework process has been defined and configured with the business process.

## VALUE DELIVERED TO THE CLIENT

Successfully implemented SAP S/4 HANA solution to the Blissco site as per schedule and trained the super users onsite to make sure the new process are adopted.

Process gaps in the SD, PP, QM and WM modules were identified and feasible solution has been proposed and implemented.

**Build globally scalable ERP platform  
to meet future customer needs and  
business challenges**
