EWM IMPLEMENTATION FOR BALADNA

OVERVIEW

Baladna is Qatar's leading local brand for milk, dairy, juice, and food products. Committed to freshness, nutrition, and innovation, it supports a healthier, sustainable future and has achieved 100% self-sufficiency in dairy production.

CHALLENGES

Manual warehouse processes and poor space use

Time-consuming, inaccurate inventory checks

Labor-heavy quality and stock inspections

Offline data entry causing delays

Need to scale for market growth

Risk of errors and unchecked deliveries

stellium

SOLUTION & ADD-ONS

- ✓ S4 Embedded EWM Implementation
- ✓ Streamlined RM/PM receiving with fewer touchpoints & better space use
- ✓ Batch traceability with expiry control & ageing reports
- ✓ Custom truck temperature & hygiene checks
- ✓ Route-based picking optimized for staging, loading, and priority

Advanced Warehouse Analytics (AWA)

Production Integration with custom FG Receiving App

Route based custom picking solution

FIORI based custom app for loading and dispatch

VALUE DELIVERED

End to end batch traceability for RM, PM, SFG, and FG

Established KPI's by implementing warehouse insights

One touch receive-and-dispatch

Vans dispatched in 6 hrs. per day

Seamless production integration with RM and FG stores

throughput-focused picking, packing and dispatch
