

Stellium Plant Automation

Future-Ready Solutions for
Smart Manufacturing &
Warehousing

Stellium In-house Innovations

Chain Brain

AI-powered supply chain assistant using GPT-4 for insights and decision support.

StockSnap

AI-driven tool for real-time inventory validation and WMS cutovers.

4Kast.ai

Forecasting engine to cut costs and increase accuracy in demand planning.

Achieving Operational Excellence

Stellium delivers end-to-end plant automation solutions designed for complex manufacturing environments, with seamless integration between production, warehousing, and digital systems.

Key Highlights

- ▶ 99.9% Inventory Accuracy
- ▶ 40% Reduction in Dispatch Times
- ▶ 98% Digital Process Automation
- ▶ 20 Integrations with 10+ OEMs

VALUE DELIVERED

Customized for Industry Needs:

Solutions tailored for industries like paint and chemical plants, addressing industry-specific dispatch and safety requirements.

End-to-End System Integration

From MES to AGVs and WCS, we unify your ecosystem for uninterrupted, real-time data flow.

Rapid Adoption

Real-time training and support reduce onboarding time and manual error rates.

Seamless Integration

Smooth data flow across all platforms.

Scalable Rollouts

Stable, uniform multi-plant deployment.

Auto Error Handling

Minimal-code, no-touch SAP error fixes.

WHY CHOOSE STELLIUM

Pioneering Innovation

Decade of Proven Experience

Customer-Centric Approach

Ready to Transform Your Plant Operations?

Let **Stellium** be your trusted automation partner.
