

SAP Elevate: ME/MII to DM Assessment Services

SAP Digital Manufacturing (DM) has the potential to bring significant new value to your organization. The transition from SAP ME and/or MII to DM should be planned as a transformation rather than a migration to fully realize this potential and meet all functional, technical, and business requirements.

Stellium offers assessment services, outlined below, to evaluate your current ME/MII system and develop a strategy for a smooth transformation with DM.

1. ASSESS THE SCALE

Begin with a **questionnaire** to determine the size and complexity of current and future implementations and outline a plan for the comprehensive assessment engagement.

Hold **workshops** and perform **audits** to understand the business requirements and identify the efforts required to execute the transformation.

2. DETAIL THE SCOPE

3. DEFINE THE SOLUTIONS

Develop a **roadmap** and **timeline** that incorporates functional and technical requirements, business priorities, budget restrictions, and other factors.

Stellium brings deep manufacturing systems expertise and delivers quality, innovative digital manufacturing solutions. We provide design and strategy consulting, Industry 4.0 consulting, and solution implementation services.
